INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. IV, 671–672 (1972)

Subject Index, Vol. IV

ABSTRACTION, of H-atoms by H-atoms from olefins (315)
ADDITION, of O atoms to halogenated olefins (521); of trichloromethyl radicals to olefins (243), (249)
BIRADICAL, intermediate in the pyrolysis of 1,1,2-trimethylcyclopropane (117)
BOND DISSOCIATION ENERGIES, in C-Nitrosocompounds (339)
BROMINATION, of dichloromethane, chlorofluoromethane, and difluoromethane (69)
CHEMICAL ACTIVATION, in the decomposition of *n*-butane, isopentane, neohexane, and *n*-pentane (1)
CHEMICALLY INDUCED DYNAMIC NUCLEAR POLARIZATION, kinetics of (513)
CHLORINATION, of halopropanes (331)
COMBINATION, of allyl radicals with allyl and with methyl radicals (273); reaction of isopropyl radicals (151); reaction of trifluoromethyl radicals (479)
CONCERTED DECOMPOSITION, of methyl hydrazine (433)
DECOMPOSITION, of 1-chloro-1,1-difluoroethane (645); of 1-chloro-1-fluoroethane (645); of 3-chloro-3-trichloromethyldiazirine in solution (229); of ethyl acetate (265); of hydrazines (433); of 1,1,1-trifluoro-2-chloroethane (559)
DISSOCIATION, of allyl iodide in shock waves (87)
ELECTRON TRANSFER, reactions of anthraquinone (639)
FLASH PHOTOLYSIS, resonance fluorescence technique, in the study of sulfur-atom reaction with oxygen (367); with ethylene (383)
HEAT OF FORMATION, of cyclobutyl radical (487); or perfluoroacetone (541)
INTERSYSTEM CROSSING RATIO, in sulfur dioxide (175), (191), (207)
ISOMERIZATION, of 1-chloro-4-bromobicyclo [2.2.0] hexane (159); of N-propylidene, cyclopropylamine to 5-ethyl-1-pyrroline (169)
ISOTOPE EFFECT, in addition and abstraction rate of hydrogen and deuterium atoms with propylene (307); secondary, for the transition from olefin to free radical (325)
ISOTOPE EXCHANGE, between iron (II) and iron (III) perchlorates (37)
KASSEL INTEGRAL, tables of (591)
KINETIC SPECTROSCOPY, in the study of combination of methyl radical and oxygen molecule (129)
LOW-PRESSURE PYROLYSIS, of ethyl acetate (265), of methylhydrazine, 1,1-dimethylhydrazine, 1,2-dimethyl hydrazine, and tetramethyl hydrazine (433)
MECHANISM, modeling of, for oxidation of alkanes (345)
MODELING, of the mechanism of oxidation of alkanes (345)
N-NITROSATION, of sulfanilamide by cyclohexylnitrite and by nitrous acid (235)
OXIDATION, of isobutane, *n*-butane, and isopentane, computational modeling of the mechanism of (345)
PHOSPHORESCENCE, sulfur dioxide-sensitized of biacetyl (175), (191), (207)
PHOTOLYSIS, of biacetyl (175), (191), (207); of 4,4-bisperfluoromethylbutene-1,4 01 (541); of nitrous oxide (497); of mercury at high processes (449)
PYROLYSIS, of 1,1,2-trimethylcyclopropane (117); of tri- and tetramethylethylene in the presence of nitric oxide (49)
RADIOLYSIS, of mixtures of carbon dioxide and hydrogen, (463)

RESONANCE FLUORESCENCE, flash phototypes technique, in the study of sulfur-atom reaction with oxygen (367); with ethylene (383)
RRK THEORY, tables of Kassel integral (591)
RRKM THEORY, applied to the decomposition of some chemically activated alkanes (1)
SECOND LIMIT, of hydrogen, carbon monoxide, oxygen mixtures (277)
STABILIZATION ENERGY, of an α-bromine atom (159); in substituted 2-aza-allyl radical (169)
VIBRATIONAL EXCITATION, of hydrogen and deuterium fluoride by atomic and diatonic species (293)

INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. IV, 673–675 (1972)

Index of Compounds, Vol. IV

ALLYL IODIDE, dissociation in shock waves (87)
ALLYL RADICALS, recombination and cross-combination with methyl radicals (273)
ANTHRAQUINONE, decay kinetics of triplet state (639)
ANTHRASEMIQUINONE RADICALS, decay kinetics of (639)
H-ATOM, reaction with oxygen ($^1\Delta g$) (255)
BENZENE, reactions with perfluoroethyl radicals (79)
BIACETYL, sulfur dioxide sensitized of phosphorescence (175), (191), (207)
4,4-BISPERFLUOROMETHYLBUTENE-1,4 01, pyrolysis of (541)
BOND DISSOCIATION ENERGY, C–H in cyclobutane (487)
n-BUTANE, decomposition of chemically activated (1); modeling of oxidation mechanism of (345); reaction with methyl radical (655)
BUTENE-1 and -2, abstraction of H-atoms from (315)
CARBON DIOXIDE, radiolysis of mixtures with hydrogen (463)
CARBON MONOXIDE, deactivation of oxygen (^1D) atoms (529); second limit of mixtures with hydrogen and oxygen (277)
CARBON TETRACHLORIDE, metathetical reaction with toluene (405)
CARBONYL SULFIDE, reaction with hydrogen atoms (547)
1-CHLORO-4-BROMOBICYCLO [2.20] HEXANE, isomerization of (159)
1-CHLORO-1,1-DIFLUOROETHANE, decomposition of (645)
1-CHLORO-1-FLUOROETHANE, decomposition of (645)
CHLOROFLUOROMETHANE, bromination of (69)
3-CHLORO-3-TRICHLOROMETHYLDIAZIRINE, thermal decomposition of in solution (229)
CYCLOBUTANE, kinetics of the formation of from ethylene (61); reaction with iodine, bond dissociation energy in (487)
CYCLOHEXYL NITRITE, in the N-nitrosation of sulfanilamide (235)
DEUTERIUM ATOMS, reaction with deuterated propylenes (307)
DEUTERIUM FLUORIDE, vibrational excitation of (293)
DICHLOROFLUOROMETHANE, bromination of (69)
DICHLOROMETHANE, bromination of (69)
1,2-DIFLUOROETHYLENE, reaction with oxygen atoms (521)
2,2-DIFLUOROPROPANE, chlorination of, and of its chlorinated products (331)
DIMETHYL ETHER, reaction with oxygen atoms (103)
1,1-, 1,2-DIMETHYLHYDRAZINE, decomposition of (433)
ETHYL ACETATE, the decomposition of (265)
ETHYLENE, abstraction of H-atom from (315); kinetics of the formation of cyclobutane from (61); reaction with methyl azide (363); reaction with sulfur atoms (383)
5-ETHYL-1-PYRROLINE, from the isomerization of N-propylidenecyclopropylamine (169)
ETHYL RADICAL, reaction with butane (657)
HYDROGEN, radiolysis of mixtures with carbon dioxide (463); second limit of mixtures with carbon monoxide and oxygen (277)
HYDROGEN ATOMS, abstraction from olefins by H-atoms (315); reaction with carbon monoxide (277); reaction with carbonyl sulfide (547); reaction with hydrogen sulfide (547); reaction with deuterated propylenes (307)

HYDROGEN FLUORIDE, vibrational excitation of (293)
HYDROGEN SULFIDE, reaction with hydrogen atoms (547); reaction with pentafluoroethyl radicals (395)
HYDROXYL RADICAL, reaction with nitrogen dioxide (529)
IODINE, reaction with cyclobutane (487)
IRON, isotope exchange between (II) and (III) perchlorates (37)
ISOBUTANE, modeling of oxidation mechanism of (345)
ISOPENTANE, decomposition of chemically activated (1); modeling of oxidation mechanism of (345)
ISOPROPYL RADICAL, recombination of (151)
MERCURY, kinetics of band emissions of excimers of (449)
METHANE, reaction with oxygen ('D)-atoms (417)
METHANOL, reaction with oxygen atoms (103)
METHYL AZIDE, reaction with ethylene (363)
METHYLHYDRAZINE, decomposition of (433)
2-METHYL, 2-NITROSOPROPANE, C—N bond dissociation energy in (339)
METHYL RADICAL, combination with oxygen molecule (129); reaction with n-butane (657)
NEOHEXANE, decomposition of chemically activated (1)
NITROGEN DIOXIDE, reaction with hydroxyl radical (529); reaction with tetrafluoroethylene (575)
NITROSOBENZENE, C—N bond dissociation energy in (339)
2-NITROSOPROPANE, C—N bond dissociation energy in (339)
NITROUS ACID, the N-nitrosation of sulfanilamide (235)
NITROUS OXIDE, photolysis of, reactions with oxygen ('D) atoms (497)
OXYGEN, reaction of ($'\Delta g$) with H-atom (255); reaction with sulfur atoms (367); second limit of mixtures with carbon monoxide and hydrogen (277)
OXYGEN ATOMS, deactivation of 'D by carbon monoxide (529); reaction with carbon monoxide (277); reaction of 'D with methane (417); reactions of ('D) with nitrous oxide (497); reaction with dimethyl ether, reaction with methanol (103); reaction with vinyl fluoride, vinyl chloride, vinyl bromide, vinylidene fluoride and 1,2-difluoroethylene (521)
OXYGEN MOLECULE, combination with methyl radical (129)
n-PENTANE, decomposition of chemically activated (1)
PERFLUOROACETONE, heat of formation of (541)
PERFLUOROETHYL RADICALS, reactions with benzene (79); reaction with hydrogen sulfide (395)
PROPYLENE, abstraction of H-atom from (315); reactions of deuterated with hydrogen and deuterium atoms (307)
N-PROPYLIDENECYCLOPROPYLAMINE, isomerization to 5-ethyl-1-pyrroline (169)
STYRENE, isotope effect in the polymerization of (325)
SULFANILAMIDE, N-nitrosation by cyclohexyl nitrite and by nitrous acid (235)
SULFUR ATOMS, reaction with oxygen (367); reaction with ethylene (383)
SULFUR DIOXIDE, sensitized phosphorescence of biacetyl, intersystem crossing ratio in (175), (191), (207)
TETRAFLUOROETHYLENE, reaction with nitrogen dioxide (575)
TETRAMETHYLETHYLENE, pyrolysis of in the presence of nitric oxide (49)
TETRAMETHYLHYDRAZINE, decomposition of (433)
TOLUENE, metathetical reaction with carbon tetrachloride (405)
TRICHLOROMETHYL RADICALS, addition to olefins (243), (249)
1,1,1-TRIFLUORO-2-CHLOROETHANE, competitive dehydrohalogenation of (559)

TRIFLUOROMETHYL RADICAL, recombination of (479)
1,1,2-TRIMETHYLCYCLOPROPANE, pyrolysis of (117)
TRIMETHYLETHYLENE, pyrolysis of in the presence of nitric oxide (49)
VINYL BROMIDE, reaction with oxygen atoms (521)
VINYL CHLORIDE, reaction with oxygen atoms (521)
VINYL FLUORIDE, reaction with oxygen atoms (521)
VINYLIDENE FLUORIDE, reactions with oxygen atoms (521)
